FIFTH PLENARY MEETING OF THE SEVENTH CENTRAL COMMITTEE OF THE WPK HELD

★ Line on Launching an Offensive for a Frontal Breakthrough Advanced
The Fifth Plenary Meeting of the Seventh Central Committee of the Workers’ Party of Korea was held at the headquarters building of the WPK Central Committee from December 28 to 31, 2019.

Kim Jong Un, chairman of the Workers’ Party of Korea, guided the meeting.

Present at the meeting were members and alternate members of the WPK Central Committee and members of the Central Auditing Commission of the WPK.

Present as observers were officials of the WPK Central Committee, officials of ministries and national agencies, chairpersons of the provincial people’s committees, the provincial rural economy committees, and the city and county Party committees and officials of major fields and units and the armed forces organs.

Kim Jong Un presided over the meeting on the authorization of the Political Bureau of the WPK Central Committee.

The plenary meeting dealt with the following agenda items:
1. On the orientation of our immediate struggle under the present internal and external situation
2. On the organizational matter
3. On modifying and supplementing the collection of the slogans set forth by the Party Central Committee
4. On celebrating the 75th founding anniversary of the WPK

The first agenda item was discussed.

Kim Jong Un made a historic report on the agenda item.

Saying that the period of the past eight months since the Fourth Plenary Meeting of the Seventh Central Committee of the WPK witnessed an uninterrupted and highly intense struggle and courageous advance, he referred to the fact that the WPK has always formulated and maintained correct internal and external political lines centred on the urgent demands, rights and interests of the Korean people and the sovereignty and security of the state and has constantly struggled for their implementation.

Kim Jong Un advanced the revolutionary line on launching an offensive for a frontal breakthrough as required by the present situation and the developing revolution.

Noting that our own internal might with self-sufficiency and self-reliance as the motive power has been further strengthened in...
Chairman Kim Jong Un of the Workers’ Party of Korea, delivering a historic report.
the tense struggle for carrying out the decisions of the Fourth Plenary Meeting of the Seventh Central Committee of the WPK, he referred to the present situation, the situation in which the Korean nation, having great strength and carrying the indefatigable will and tremendous potentiality while proudly advancing and leapfrogging in the difficult situation true to the appeal of the Party Central Committee, is standing in the light-years-long construction holding higher the unfurled banner of self-reliance.

He said that the challenges that have faced us in the past several months have been so harsh and dangerous that others would not withstand them and yield to them, but no difficulties could stop or delay the rush of our people advancing undoubtedly as a solid integral whole, and they have achieved great successes ceaselessly in bolstering up the strength of the state and in increasing its defence capabilities, and this was one of the main factors.

The colossal and complicated work of developing the state-of-the-art weapons system possessed only by advanced countries in defence science and technology presupposed our own finding of innovative solutions in terms of the scientific and technological aspects without anyone's help, and all the research tasks were perfectly carried out by our own scientists, technicians and researchers.

This means a great victory, and our possession of promising strategic weapons system planned by the Party one after another constitutes a great event in developing the armed forces of the Republic and in defending and guaranteeing our sovereignty and right to existence. This leap forward in developing the state-of-the-art national defence science would greatly promote the increase of our national strength, improve our power of putting the political situation around us under control and give the enemies the blow of serious uneasiness and horror. In the face of the US, he added, we have so far defended as valuable as our own life, in the hope of peaceful development, to make it fully pay for the pains sustained by our people. If there were not the nuclear issue, the US would find fault with its own actions without hesitation. The US will find fault with its own actions.

He said that we will never allow the impudent US to abuse the DPRK-US confrontation, and instead of taking offensive measures to reliably ensure the sovereignty and security of the state, we will never allow the impudent US to abuse the DPRK-US confrontation, and instead of taking offensive measures to reliably ensure the sovereignty and security of the state, we will continue our sincere, friendly and courageous dialogue with the US. For this, we will take powerful measures to strengthen our internal strength in all aspects.

Referring to a series of successes achieved in economic construction, he said; This year we reaped an unprecedented bumper harvest that exceeded the peak-year level even under many restrictions created by the heinous sanctions imposed by the hostile forces and continued construction, he said:

Analyzing the trend of the prevailing situation, he said that the real intention of the US is to seek its own political and diplomatic interests while wasting time away under the signboard of dialogue and negotiations. He said that time is the same time key sanctions so as to gradually reduce our strength. He stressed that we further hardened our determination never to barter the security and dignity of our state and the stability of its future for anything else.

Noting that the stalemate between the DPRK and the US cannot but assume a protracted nature as the US is raising demands contrary to the fundamental interests of our state and maintaining a belligerent attitude, he said that recently the US has been talking about continued dialogue while peddling the issue of the resumption of dialogue here and there, which is just a way of defaming our state and a means of putting pressure on our state. He said that we will never allow the impudent US to use its nuclear weapons to negotiate with the DPRK.

He said that the US has applied the most brutal and inhuman sanctions against our state, and that the US has imposed sanctions against our state, and that the US has imposed sanctions against our state. In the current offensive for a frontal breakthrough is a gigantic, patriotic struggle to be waged by the high-spirited enthusiasm and creative efforts of millions of the working people, he said, adding that if all sectors, units and citizens make efforts to increase production and practise economy to the maximum so as to create more of their own things and save them as much as possible, our economy will remain unperturbed and our living standards will be improved, no matter how hard the struggle for self-reliance will be. He underscored the need to launch a vigorous campaign for economical use of electricity throughout the country, raising a wind-emulation drive for tapping reserves and further increasing production and practising economy in keeping with actual conditions of one's own sectors and units, making all sectors and all units give precedence to the improvement of the quality of their products and creations on the principle of giving priority to quality over quantity, taking decisive measures to rectify the poor-quality state of their products and creations, and making all sectors and all units give precedence to the improvement of the quality of their products and creations on the principle of giving priority to quality over quantity, taking decisive measures to rectify the poor-quality state of their products and creations.

Referring to the prevailing situation, he said that the US has increased the nuclear threat against our state and has stepped up the ranks of teachers in terms of quality, and for improving the conditions and environment of education substantially with strenuous efforts.

Noting that our public health is a major criterion of the image of socialism through which the people directly enjoy the advantages of our system, he set forth important tasks arising for our socialist public health service, which was provided by President Kim Il Sung and Chairman Kim Jong Il and which is the best in the world, in sustaining its original features, building up its material and technological foundations and training all the medical workers to be true health workers of the Workers’ Party possessed of warm human love and high level of medical qualifications.

He underscored the need to launch a dynamic struggle to increase production, practise economy and improve the quality of products, conserve ecological environment and take strict measures to prevent natural disasters.
