The Political Bureau of the WPK Central Committee adopts resolution on convening Fourth Plenary Meeting of Eighth Party Central Committee

KCNA

The Fifth Political Bureau Meeting of the Eighth Central Committee of the Workers’ Party of Korea took place at the office building of the Party Central Committee on December 1.

Kim Jong Un, general secretary of the WPK, was present at the meeting.

Also attending the meeting were members of the Presidium of the Political Bureau of the Central Committee of the WPK and members and alternate members of the Political Bureau of the Party Central Committee.

The meeting discussed the issue of convening the Fourth Plenary Meeting of the Eighth Central Committee of the WPK.

The respected Comrade Kim Jong Un presided over the meeting.

General Secretary Kim Jong Un referred to the fact that the major policy targets decided at the Eighth Party Congress have been pushed forward forcefully and militantly all the year round thanks to the correct guidance of the Party Central Committee though difficulties still lie in developing the country’s economy.

Saying that the successes registered by us show that the overall affairs that had been planned to lay a foundation for the economic development of the country and the improvement of the people’s living standards have been vigorously pushed forward and that they give self-confidence in a fresh victory of our own-style socialism, he gave an appraisal of the Party Central Committee that this year is the year of victory in general.

Noting that next year will be an important one as we should wage as giant a struggle as we did this year, he said that the Party Central Committee should work out plans for new year well to be dynamic, onward, scientific and detailed to consolidate the foundation for implementing the five-year plan.

He gave assignments for the preparation of the plenary meeting.

The Political Bureau of the Central Committee of the WPK adopted a resolution on convening the Fourth Plenary Meeting of the Eighth Central Committee of the Party late in December and discussed what to put on the agenda of the plenary meeting.
Attaching importance to science and technology and quality of beer

By Choe Hyang Ok

The Taedonggang Brewery draws attention to the development of science and technology and improves the quality and taste of beer.

“We assign a high priority to science and technology and encourage all employees to be engaged in scientific and technological innovation,” said Ro Hyo Nam, chief engineers of the brewery. “Having set up a goal to train all employees as qualified technicians, the factory found the solution to a number of issues with the smart learning space well and giving full play to the advantages of the study-while-you-work system. Thanks to all of it, the space is being used by full sets of computers and other IT means, since over 400,000 pieces of data related to beer brewing and the facility is an environment in which all employees under 35 years of age are equipped with the tools of online courses and training and heads of departments and workshops took full responsibility for their study. As every employee shows enthusiasm for the study of science and technology and is eager to learn, it demanded each workshop zone to set up more than one technical innovation plan every month while building up a system of strictly examining the results of each monthly examination. The factory made up a methodology of scientific and technical and economic effectiveness of the collected innovation ideas at the end of month before their actualization. The factory biased towards high-technology innovation for the help of additives made with yeast waste, aiming to perfect a production method in the use of low-energy beer production capacity. On the basis of research and analysis of the biological qualities of adenosine and phosphatidylcholine whose high and preservation safety has been improved in production of high-quality beer.

It expanded the carbon dioxide production capacity of the brewery accordingly. It is additionally encouraging the development of the carbon dioxide on-site power production.

The modernization has made it possible to put the production of preventive medicines for domestic animals on a scientific basis and keep up production at a higher level so as to ensure the sustainable development of animal husbandry.

For this purpose, the Pyongyang Veterinary biological medicine institute established a laboratory, which was recently equipped with a modern electronic automation designing system.

It was attended by Su Yong, secretary of the Central Committee of the Workers’ Party of Korea, Ju Yong, minister of Agriculture industry, relevant officials and officials of the institute.

A meeting was held in November at the Pyongyang Veterinary biological medicine institute. The meeting was attended by Kim Jong Song, head of the electronic industry management bureau, Yang Song Hye, head of the electronic industry management bureau, and others.

By Jong Hwa Sun

The Pyongyang Commodity Inspection Laboratory completed an automatic system of microwave oven for the production of high-quality beer.

“Study work on the production of high-quality beer is never an easy task. We have many difficulties with respect to the study and actual results. In the course of this, the researchers, in addition to the study-while-you-work system, the study work on the production of high-quality beer is never an easy task. We have many difficulties with respect to the study and actual results. In the course of this, the researchers, in addition to the study-while-you-work system, worked hard to get familiar with all components and functions of the lab. Our lab was put to use in the workplace, to meet the growing need for microwave oven.

Her wish is to get her diploma at a university and to work on the production of high-quality beer.
Farming villages transformed into socialist fairyland

Hwang Chun Son

The construction of farm houses is bravely conducted in rural construction to build rural villages in a balanced way so that they preserve regional characteristics. In recent years, a new waterway project, which was completed in the DPRK, has been carried out. The project is a part of the efforts to develop the waterway systems throughout the country, including the waterway in North Hamgyong Province.

The waterway project, which was completed in North Hamgyong Province, has been inaugurated to provide irrigation water to fields. The project has been carried out in the past few years, and the completion of the project has provided irrigation water to fields in the rural areas of the province.

Rural villages develop features of their own

By Kim Il Jin PT

The Kangbuk Vegetable Cooperative Farm in Kangbuk-ri of Kumchon District in Kangbuk County has integrated the process of vegetable production, processing, and selling. The farm, which was established in 2016, produces vegetables using advanced scientific farming methods. The farm has also introduced new varieties of vegetables, including pepper, cucumber, and tomato.

Middle school graduates volunteer as weavers

More than ten volunteers to Pyongang Kim Jong Suk Textile Mill resolve to live and work like labour innovators who have volunteered in increasing number in Ryonggang County, according to a recent report of the County youth league (pictured) who, as a junior official of the Ryonggang County youth league, volunteered to work as a farmer after graduating from the Donghae Cooperatives Party in January.

Among these volunteers, who have deeply impressed many local people throughout the year, is Kim Chung Song, who received certificates of volunteer before enrollment cards.

They have different native villages and dreams, but they have one in common: they have one fervent desire to work.

The country provided us with new uniforms every year, such clothes and other conditions for study from nearest homes. It is named for us to repay the favour and live down in it."

By Ri Hyang Juon

On August 2, 2021, Pyonggang Textile Mill noted for splendid cultural performance

Younger Technical Middle School, Pyonggang, is noted for playing well ensembles, four-ordered Korean musical instruments. "Ong userManager is one of new generation for Korean music, which was made in 1983 to meet the aesthetic sense of the times, while preserving with the characters and timbre peculiar to national instruments of Korea. We have long put efforts into teaching how to play ensembles in order to implant national instruments into the hearts of coming generations and build and develop national music," said Pak Son Hui, teacher of the art group.

The sound box of ensembles in the art school is made of a tree trunk of national music, which was favoured by the Korean women, and it is my dream to be a proficient musician."

There is a round sound box and four strings on the instrument. The instrument is designed to play softly or sharply any kind of melodies can be played by applying tremolo and plucking the strings.

Financial management app welcomed by housewives

By: Kim Chang Il PT

It is a great help to users in fully understanding their income and outgoings and managing their finance effectively and in a planned way. It is especially favored by housewives,” said a developer Kim Seo Yoon.

Many housewives who have used Mulpangul 1.0 express that satisfaction, as they can use a household account books or calculators and can see the balance between monthly income and expenditure. “It greatly relieves the mental and physical burden on housewives in controlling family finances,” said Ham Chong A. Living in Sosong District of Pyongyang. She added that it is very useful as it has the function of estimating cash income, expenses and balance with the help of its different functions and subsystem.

Meanwhile, several subscribers show that the website was a great help to people’s life.

Web site ‘Konggang’ catches public eye

By: Kim Ryo Yong PT

Smart phone-based IT service is now indispensable in all this life. At present, more useful and convenient IT products are being unveiled one after another.

“Our IT products are in great demand and are of use not only to medical doctors and medicines on the website and but also to a user who needs to process a free delivery service through the website, which is another great help. Not only can we check the condition of the wonder as she had low blood sugar and the fluctuation of blood pressure.

That day, she got a good prescription through the website as she consulted with a doctor and drew on experience from others. When the gave an order for some pills, it was nearly midnight. Feeding the baby with the help of the computer. The mother would prepare the milk and study the website for children’s diseases, thereby enabling them to conveniently express their satisfaction, and maintain credit in the balance between monthly income and spending on the budget and ideally control the fluctuation of blood pressure through the computer. “It greatly relieves the mental and physical burden on housewives in controlling family finances,” said Ham Chong A. Living in Sosong District of Pyongyang. She added that it is very useful as it has the function of estimating cash income, expenses and balance with the help of its different functions and subsystem.

Abduction and drafting of Koreans–grave crimes with no statute of limitations (2)

Kim Jong Hyok
Interministerial treatment and suffering imposed upon forcibly drafted North Koreans

Japan has been abducting North Korean people force and forcibly drafting them to work under inhumane conditions that violate their human rights. Many North Korean people have been killed, injured, and psychologically and physically suffered. Some of them have disappeared. A research team working in North Korea under North Korea's Wider Scope was established in 2008 to investigate the human rights situation in North Korea. The team has been investigating the human rights situation in North Korea and its progress has been reported on a regular basis.

The human rights situation in North Korea is very serious. The government of North Korea, under the leadership of Kim Jong-un, has been holding a virtual right to either take their own lives or to be detained and denied any justice. The human rights situation in North Korea is a violation of the United Nations' human rights standards. The UN has been calling on the international community to take action to stop the human rights violations in North Korea. The government of North Korea must be held accountable for its violations of human rights.

Club focuses on scientific training to retain dominance

**By Han Kwi Hun PT**

The sports club of the Pyongyang Kim Jong Suk Textile Mill is continuously directing big efforts to the development of tennis. “We are instructing and training players on a scientific basis to maintain our national dominance in tennis,” said head coach Ri Kwang Chol.

Tennis coaches of the club are increasing the training efficiency by introducing scientific training means and methods while enhancing physical and technical abilities of players. At the same time, they are scupulously organizing the guidance on training with the main focus placed on developing the players’ ability to apply different tactics. Especially, they are intensifying instruction of players withfortes by encouraging them to refine their special skills and providing them with comprehensive training in combination and tactics. The club frequently organizes training matches so as to prepare players to be able to actively apply theirfortes and various drives in any situation.

“Our players are always under pressure and tension with the thought that they should retain national dominance and since most of the leading players in the national tennis rankings are in our club, there is an intense rivalry between them,” said Ri, adding these factors have good effects on stimulating their zeal for training and developing the sport.

An Chung Il and Kim Sung Hyok who have produced good results at many national events are making redoubled efforts to attain a higher goal in training. “We often confront fellow players of the club at official events. It leaves us at full strain since we know about each other just too well. So, we attach much importance to training matches,” said An.

By Kwon Hyo Song PT

Mt Paektu is the sacred mountain of Korea which is associated with immortal leadership exploits of President Kim Il Sung and Chairman Kim Jong Il.

The Paektusan Biosphere Reserve covers an area of 126,126 hectares. It is made up of volcanic cones in a lava field consisting of heaps of lavas and pumice stones, the output of volcanic eruption. Its terrain is low around its margins and becomes gradually higher with Janggun Peak at the centre. There are a basin formed by the collapse of a crater on the ridge of Mt Paektu and more than 20 peaks of the outer rim around the basin. Janggun Peak is the highest one of the peaks on Mt Paektu with an altitude of 2,750 metres above sea level.

The basin takes an oval shape lying north and south and there is a vast expanse of Lake Chon. The lake is 2,190 metres above the sea and the deepest place is 384 metres deep. The volcanic basin is 944 metres deep and is regarded as an unusual crater in the world.

The reserve is the coldest region in Korea as it is at 2,750 metres above sea level. As winter continues for more than 170 days in a year, the reserve is covered with heavy snow.

The atmospheric pressure is low. As it is located in the highest part of Korea, it has diverse fauna and flora according to different climatic zones. In the reserve 2,901 species of plants grow. Although they number little in species, gymnosperms take the major part of plants in the Mt Paektu area. Such trees as Abies nephrolepis, Picea koraiensis, Korea larch and Siberian larch take a large proportion.

It occupies the alpine area connected by land with the Asian continent. It is home to lots of animals including 61 species of such mammals as tiger, deer, red deer and brown bear and 235 species of such birds as heat cock and pheasant.

Thanks to its uncommon topographical conditions, it is rich in fauna and flora and can be claimed to be a natural zoo.

Its natural and living monuments include blueberry on Mt Paektu, pine on Yongji Peak, heat cock in Samjiyon, Korean tiger on Mt Paektu, deer and red deer in Samjiyon, Lake Chon on Mt Paektu and Rimyongsu Falls.

“The Paektusan Biosphere Reserve was created in April 1989, making it possible to develop the work for preserving and protecting biodiversity in the area of Mt Paektu as a matter of global concern,” said Ri Song II, chief of the nature conservation lab of the Central Committee of the Nature Conservation Union of Korea.

By Jong Chol PT

The Jongbuk Temple is a shrine located at the southern foot of Mt Sungam in Sungum Workers’ District, Kyangson County, North Hamgyong Province.

It was built in memory of four renowned persons who performed feats in opening up the northern region of Korea, including Yun Kwan in the period of Koryo Kingdom (918-1392) and Kim Jong So during the feudal Jodon dynasty (1392-1910).

It was originally called Ro Hall when built in 1437 and renamed Jongbuk Temple in 1845.

It was destroyed by foreign invaders in 1868 and rebuilt at the same site in 1901. The temple surrounded by a square fence and there is the Jongbuk Pavilion at the front as an entrance to the temple.

In the middle of the area inside the fence there is the Yanghyon Hall. Behind the lecture hall there are the main temple and a pavilion built in memory of Yun Mun Suk who was a government official in the period of Koryo.

The two-storey Jongbuk Pavilion with gabled roofs is painted colourfully. The Yanghyon Hall is a gabled building on the stylobate and its right and left rooms have underfloor heating.

The Jongbuk Temple is in good preservation as a historic site which provides valuable information about the architecture of the feudal Jodon dynasty and the history of opening-up of the northern region of Korea.
